7.21 Yard of the Quarter
7.28 The Boss Baby

Nothing says America better than Red, White and Blue! Place egg white halves into bowls of colored water and soak them for 1-2 minutes for a festive presentation at your BBQ.

Your AC Filter

Check the air filter once per month and replace it as needed. This is especially important during the summer when dust and allergens circulate. If the filter becomes clogged, your system will have to work harder to supply the same amount of cool air.

Replacing filters is one of the easiest and most effective methods of conserving energy and saving money on your HVAC usage. And much like changing the oil in your car, it's a critical step in maintaining your system's long-term health.
