Maintenance Tip

When utilizing your heaters during the cooler season please ensure that you have a clean air filter. Air filters should be replaced every 30 days. Stop by the community center and pick one up. Also, when turning on your heater for the first time, you may notice a light "burning" smell. No need for alarm, this is just the fibers on the air filter and in the air vent. Please contact our Maintenance team at 844-887-6840 to submit a work request if the smell doesn't stop.
