With summer quickly approaching the weather is going to get a lot warmer. SDGE suggest keeping AC at 78° and using ceiling fans to cool your home. A great way to make this change is the simple step of increasing the temperature 1° at a time. You'll hardly notice the change but you will see a difference in your bill. Also, please remember to stop by our office for a new filter every 30–60 days. Don't forget you can always visit the community pool to stay cool!
